Prognostication for the

Yeare of our Lord God,

1661.

Wherein wee have a Tide-Table,
the time of the Eclipse for this Yeare,
with divers observations for Physick,
and Husbandry, and Gardening; and
also for making of all sorts of Bonds,
Bills, Acquittances, Wills, and Inden-
tures; with High-ways, and Faires.

CALCVLATED

For the *Meridian* of Kings-Lyn,
where the Pole is elevated 52 Degrees,
and 43 Minutes above the *Horizon*,
and may indifferently serve for any
other place within this
Kingdome.

L O N D O N,

Printed by T. FAVVET, for the
Company of Stationers. 1661.

By the helpe of two following Tables, you may readily find the time of full Sea, or High-water at any of the Havens under-named without any notable errour: Except the Moones latitude, Land-floods, contrary Winds, &c. somewhat alter the time: The first sheweth the Names of certain Havens, the point of the Compass whereunto the Moone coming, maketh High-water.

Fly, 1661.

Of the Eclipses this Yeare, 1661.

THere will be foure, two of the Sun and two of the Moone, but not all visible in our Horizon.

The first will be of the Sun, which will be the 20. day of *March*, 42. min. past 9. a clock in the forenoon.

The 2. will be of the Moone, the 4. day of *April*, 30. min. past 3. of the clock in the afternoone.

The 3. will be of the Sun, the 13. day of *September*, not visible in our Horizon.

The 4. will be of the Moon, the 28. day of *Septem.* 56. min. past 2. of the clock in the Morning.

A description of the 4. Quarters of the Yeare.

The first quarter begins when the Sun enters into the first point of Aries, which will be the 9. day of *March*, 40. min. past 12. a clock at night.

The Summer quarter.

Rules

Fly, 1661.

Rules concerning Husbandry,

WHen you would Plant or Graft, consider where the wind bloweth, if it be in the South, it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or graft generally the Moone increasing in these signes, *Taurus*, or *Aquarius* in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in *Taurus*, *Leo*, or *Aquarius*.

Cut timber to have it sound, in *December*, or *January*, in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the moneth of *Febr.*

Plath hedges and Lop trees for fewell, that the heads may the sooner grow again, when the Moone is in *Aries*, or *Libra*, and in her increase.

Set young Quicksets, from *September* to *March*.

Remove young trees in the last quart. of the ☾, when she is in ♋, ♎, ♏; and in these months *Septemb.* *Novem.* *Febr.*

Set Vines in *February*, *March* or *September*, specially the Moone in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose trees in the midst of *February*, the ☾ increasing.

Cut or prune trees in *March* or *Aprill*, the Moon in *Taurus*, *Virgo* or *Capricorne*.

Gather fruit, as Apples, Pears, and the like, at the full ☾, in the after-noone, the weather being faire and dry.

Cut downe Hay presenely after the full of the Moone.

Dung ground to prevent growing of weeds, the Moone decreasing.

Sow Carret-seeds about the end of *February* or the beginning of *March*, the Moon increasing. Also, sow Onions and Leekes in *February* or *March*, at the wane of the Moone.

Sow Cucumbers and Millions in *February*, *March* or *June*, in a hot and faire day.

Sow Parsly, Fennel, and Anniseed, in *February* or *March* at the full of the Moone,

Fly, 1661.

Sow Marjerum, Violets, Time, Rosemary and Lavender, in *February, March* or *April*, in the increase of the moone.

Sow Gulliflowers and Wall-flowers in *March* or *April*, in the old of the moone.

Sow Hyssop and Savory in *March* when the moone is old.

Sow double Marigolds in *February* or *March*, in the increase of the moone.

Sheare Sheepc at the increase of the moone.

The best time to Geld cattel the Moone being in *Aries* *Sagittarius* or *Capricorne*.

Of Blood-letting, and some other Physicall Observations.

In Youth let blood from the change to the first quarter, in middle age, from the first quarter to the full. In *Older* years from the full to the last quarter. In old age, from the last quarter to the change.

But know, that under the age of 14. and above the age of 56. It is not good to bleed at all.

Again, in the *Coniuncti* or *Dog* Dayes, it is very hurtfull to take any Physick at all, unless there be great need, and indeed necessary hath no law: Wherefore in such a case, the disease being desperate, the cure must be adventured.

Take a purgation when the Moone is in *Trine*, or *Vertile* aspect, with *Jenius* decreasing in any of these three signs. *Cancer*, *Scorpio*, or *Pisces*, and it will be sure to worke the better, because when a most Planet, in a most signe hath such an aspect, the humours in the body are then stirred up and down, and so the better purged out, wherefore in this case, it cannot be amisse to prepare humours by some thing that is laxative: and yet this be done whilst the Moone is either in *Gemini*, *Libra*, or *Aquarius*.

Take a vomit that it may worke thoughtly, when the Moone is in *Aries*, *Cancer*, or *Capricorne*: and know that the aspects of the Moone with *Saturne*, or *Mars*, or the Moone in *Leo*, ought to be eschewed in the taking of medicines.

Finally, if necessarily urge no hurt, these observations are expedient: for it is a plaine truth, that the change of weather upon differing aspects, doth greatly change and alter mens bodies.
